

ContiSeal™: the self-sealing standard production tyre.

For enhanced mobility, even if a foreign object penetrates the tyre tread.

ContiSeal™: the self-sealing standard production tyre.

ContiSeal™ tyres contain an innovative technology which seals punctures in the tread area. They have a sticky, viscous layer from shoulder to shoulder that instantly seals punctures caused by nails and other objects up to 5 mm in diameter. The layer temporarily seals the vast majority of tyre tread punctures. The material in the layer prevents air loss even if the penetrating object becomes dislodged. As a result there is no need to stop straight away or change the tyre immediately in the event of a puncture. Despite this, the tyre should be taken as soon as possible to a tyre specialist who can examine it to determine if it needs a permanent repair. ContiSeal™ tyres are instantly recognisable by the symbol on the sidewall and are compatible with all commonly available wheel rims.

ContiSeal™ tyres – the benefits at a glance:

- Seals punctures in the tread area caused by penetrating objects up to 5 mm in diameter
- Holes are sealed even if the penetrating object becomes dislodged
- Have the same high performance under normal driving conditions as non ContiSeal™ tyres
- No need to stop straight away or change the tyre

ContiSeal™ tyres are available in the following types and dimensions.

235/45 R 17 94W ContiSportContact™ 3 ContiSeal™

235/40 R 18 95W XL FR ContiSportContact™ 3 ContiSeal™
